Contact us:

Phone: 02 8700 3833

Fax: 02 9790 2968

email: maint@henry.com.au

Phone, fax or email your breakdown problems to us or **submit** a Breakdown Service Request Form direct from our website.

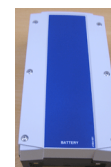

Our dedicated Schedulers manage your breakdown and contact you with any queries. They will also manage Guarantees for clients when repair work on equipment still under Guarantee from a manufacturer is carried out.

Spare parts:

HenryCare has access to a vast network of parts suppliers so that we can source reliable, fit for purpose parts from Australia or around the world. Because of our bulk buying of parts, HenryCare spare parts are amongst the cheapest around. **Discounts apply for**

Customers on Preventative Maintenance Programs.

Preventative Maintenance Programs:

Using sophisticated databased technology HenryCare is able to manage all Aged Care Facility and other Institution Maintenance Programs simply and with no effort required by the client.

We can make your equipment maintenance problems disappear !!!

In conjunction with the client a **Program Maintenance Schedule** (see below) is agreed and from there everything is a simple process:

- There is no charge for these Reports which are a vital part of Aged Care Facility Accreditation.***

Program Maintenance Schedules			Times PA	Contr#	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	dd/mm/yy
Lifters full body x 3	2pa	797					X						X				1/3/12
Lifters standaids x 1	2pa	798					X						X				1/3/12
Summary Reports	2pa	799						Rep						Rep			1/3/12
Weigh chair x 2	2pa	810					X						X				5/2/12

HenryCare is a **totally Australian owned company** which has been in the Aged Care, Rehabilitation and Hospital equipment supply and servicing sector for over 50 years. Your organisation can benefit from this vast experience by using HenryCare's proven sophisticated systems for equipment repairs and maintenance.

A photograph showing a person's hands adjusting a pneumatic cylinder on a robotic arm. The cylinder is connected to a lever system that controls the force applied to the arm. The person is turning a knob on the cylinder to increase or decrease the force.
